**müller**  
**Müller to offer straw collection scheme in schools**  
**Overview**  
Following a recent meeting with pupils at Sunnyside Primary School in Glasgow, Müller were so impressed with the pupils' commitment and detailed research, that they are putting in place a new scheme to help tackle the issue.  
**The approach is based on three additional actions:**  
1. Müller's current advice is to push the straw back into the carton and for it to be sent back to be recycled. This message will **now be communicated much clearer on pack**.  
2. If schools start collecting plastic straws and **send back to Müller**, they will recycle them as part of their own current recycling stream.  
3. **Back to Müller**, the company will **recycle their own**.

Can you help Hannah design a bin that stops the animals getting in to it but also compliments the environment?

Every time I visit the beach or the river all I see is litter! Some of the bins that are there allow the animals to get inside which is dangerous.

I am so fed up seeing so many birds and sea creatures being hurt or killed because they have been tangled up in our waste.

Can you help Mark solve this problem by designing and creating a filter that would catch some of the plastic in our oceans?
