

Fairtrade Fortnight 2018

February 2018

#FairtradeFortnight

The leftover cottonseed is then pressed to make cooking oil

Lint is then spun into thread and yarn to make a range of products

Cotton is typically grown in warm and tropical climates

The fiber is then separated from the cottonseed. This is what makes lint

It's cool to celebrate #FairtradeFortnight! In this cold weather it's important to wrap up. Cotton is one of our most common clothing materials. Can you correctly order the 6 stages of cotton manufacture?

Flower produces a white downy fiber known as bolls

This is then sewn, knitted or weaved into garments

#FairtradeFortnight

**A time when they're green, a time when they're brown,
But both of these times, cause me to frown.
But just in between, for a very short while,
They're perfect and yellow, and cause me to smile!**

I'm having a bit of difficulty solving this riddle. I know it's talking about a fairtrade product but I can't work out which one. Can you help me?

I love a coffee first thing in the morning but since it's #FairtradeFortnight I'm trying to work out where my morning cup comes from. These are the top 5 countries that produce the most coffee but what countries are they?

#FairtradeFortnight

Since it's Fairtrade Fortnight I thought you could help me identify a few Fairtrade products. What common products are in the pictures?
